

PRE-BRIEFING PREPARATION GUIDE

THE AUGUST 6TH CHECKLIST

SPX	5,528.75	▲ 0.64%
NDX	19,345.12	▲ 0.81%
RUT	2,087.14	▲ 0.35%
VIX	14.21	▼ 0.42
DXY	103.62	▲ 0.21%
10Y	4.18	▼ 0.03
CL1!	74.18	▲ 0.27%
GC1!	2,406.80	▲ 0.19%
BTCUSD	62,874.00	▲ 1.12%

WHAT'S ABOUT TO HAPPEN

ON AUGUST 6TH, OVER \$120 BILLION IN CAPITAL BECOMES LIQUID. ALL AT ONCE.

When that happens, you're going to see a flood of buying and selling activity unlike anything we've witnessed in years.

Some stocks will surge. Others will collapse. And millions of investors will be caught completely off-guard.

But if you know what to watch for - if you can spot the warning signs before the move happens - you'll have an edge most traders never get.

HERE'S THE PART THAT SHOULD GET YOUR ATTENTION:

This checklist won't just come in handy today - but for the rest of the year.

Because if I'm right about August 6th, what happens on that date is just the beginning.

THE REAL OPPORTUNITY COULD LAST MONTHS.

SO LET'S GET YOU PREPARED.

SIGNAL #1**WATCH THE VOLUME VS. PRICE**

Most traders only look at whether a stock is up or down. But professionals watch it through a different lens: volume.

PRICE RISING + VOLUME SHRINKING = A WARNING SIGN

When a stock is climbing on strong volume, that's normal - buyers are in control. But when a stock keeps climbing and the volume starts to shrink, fewer people are willing to pay higher prices. Momentum may be fading.

WHAT TO WATCH FOR

- Expanded price ranges with declining volume: the stock is moving a lot, but fewer shares are changing hands. That's problematic.
- Relative volume: compare today's volume to the average over the last 20 days. If a stock is hot but volume is below average, that's a red flag.
- Total shares over time: don't just look at one day. Track volume across the entire run. If it peaked early and has declined ever since, the fuel may be running out.

BOTTOM LINE: WHEN VOLUME DRIES UP WHILE PRICE IS STILL RISING, GRAVITY MAY BE ABOUT TO KICK IN.

SIGNAL #2

COUNT THE CANDLES

If you're new to reading stock charts, this might sound technical. But it's simpler than it sounds.

**GREEN CANDLE**

Closed higher than it opened

**RED CANDLE**

Closed lower than it opened

It's not just about one candle. It's about how they stack up. A long streak of same-colored candles can look powerful - but professionals ask a different question:

"HAS THIS HAPPENED BEFORE? AND IF SO, WHAT CAME NEXT?"

WHAT TO DO

- Count the candles: if a stock has been green for 7+ days straight, pull up the historical chart and look for similar streaks.
- Check what happened after: did the stock keep climbing, or did it reverse hard?
- Look for exhaustion: the longer the streak, the closer you may be to the breaking point.

THESE ARE JUST 2 OF 5 SIGNALS

I'll be looking at ahead of August 6th.

PRE-BRIEFING CHECKLIST

BEFORE JULY 23RD AT 8:00 PM ET, MAKE SURE YOU HAVE DONE THE FOLLOWING:

- ☐ Write down your top 3 questions - bring them to the live Q&A.
- ☐ Block your calendar - July 23 at 8:00 PM ET. No distractions.
- ☐ Have a notepad ready - you're going to want to take notes.
- ☐ Start watching volume and candles - practice spotting the signals above on any stock you're tracking.

JULY 23RD @ 8:00 PM ET

YOUR GOAL BEFORE THE BRIEFING

Arrive with questions. Know the two signals. Have a few charts ready. Be prepared to learn how the August 6th setup could ripple through your portfolio.

YOUR QUESTIONS ANSWERED

WHAT HAPPENS IF I IGNORE THIS WARNING AND EVENT?

You could get totally blindsided. What happens on August 6th could ripple through your entire portfolio - whether you're positioned or not.

ARE YOU JUST GOING TO REVEAL SOME STOCK PICK?

No. We'll discuss a few companies, but this is bigger than any one stock. The \$120 billion estimate could get much bigger - and it may only be the start.

CAN A REGULAR TRADER DO THIS?

Yes. This works in a regular brokerage account. You don't need institutional access or millions of dollars. You need to understand the trade - and know when to deploy it.

I'M BUSY. SHOULD I STILL SHOW UP?

Absolutely. You won't need to sit glued to a screen or monitor charts 24/7. I'll explain exactly how on July 23rd.

SEE YOU JULY 23RD @ 8:00 PM ET

Now you're prepared. All that's left is to get ready to learn the one trade that could unlock the August 6th windfall.

- JEFF ZANANIRI
